

ICT Project Manager (Senior)

Job description

24SEA is a company specialised in structural health monitoring with the main focus on offshore wind structures. 24SEA is founded in 2016 as a spin-off company of the Vrije Universiteit Brussel and has built a strong and reliable reputation ever since. As the company is growing together with its sector, we are looking to expand our dataflow team. You will be part of a small, dynamic team that carries out projects from A to Z. Within this team you will be responsible for the following tasks:

- Manage the dataflow team. This team is responsible for the dataflow-related tasks in the projects (e.g. transfer of data from offshore to onshore datacentre).
- Follow-up of the dataflow and ICT infrastructure part of the projects where you are the ICT-related first point of contact for the customer.
- Take the responsibility for bringing projects to a successful conclusion. This implies:
 - Design and document the ICT infrastructure and dataflow, coordinate the deployment of the systems and perform the quality control assessment (Factory and Site Acceptance Tests)
 - Procurement: maintain relationships with suppliers and external developers.
 - Perform a quality check on installations, troubleshoot if necessary and set up a handover to the customer.
- Manage the dataflow products and procedures.
- Manage the implementation of cybersecurity measures (ISO27001, NIS2)
- Support the sales team (presales).
- Coordinate potential certification processes.

Profile

You possess following professional skills:

- MSc in informatics or computer engineering sciences / technology or equivalent through experience in the discipline
- A minimum of 7 year work experience and experience in managing of projects and teams
- Dataflow related skills:
 - MQTT
 - Cyber security
 - Monitoring tools (e.g. Zabbix, ...)
 - Relational databases and data modelling

- ICT infrastructure related skills
 - Atlassian environment
 - MS365 environment (optional)
 - Cyber security (networking, monitoring, incident reporting,...)
 - Kubernetes
- Good knowledge of English and Dutch (verbal and written)
- Experience with python and API development are a plus
- Experience with InfluxDB, Zabbix are a plus
- You have a driver's license (B)

You possess following personal qualities:

- You can work very independently, take initiative and adopt a proactive attitude
- You can work in a structured way and draw up and follow plans
- You can communicate clearly and to the point
- You work customer-oriented
- You are flexible and have no problem traveling abroad for short periods

Offer

We offer you a very varied job within a dynamic team in an innovative high-tech company that is active in the growing sector of renewable energy. At 24SEA, we find it important that everyone's tasks are perfectly aligned with his/her interests. Furthermore, there is always room for input, along with opportunities to undergo training, allowing you to grow with the company. You can also count on the following:

- Competitive remuneration incl. fringe benefits (company car, group and hospitalization insurance, meal and eco vouchers, ...)
- Flexible working hours
- The possibility of working from home
- The opportunity to work in a very dynamic and innovative industry around the world
- ...

Place of employment

24SEA
Z.3 Doornveld 120, 1731 ZELLIK
